Just in time for the weekend, Microsoft has announced that you can now download the new Windows 10 Anniversary Update ISO files onto a USB flash drive. This means that you can install Windows 10 onto the drive and transfer it over to any Windows 7, 8.1 or 10 system you have sitting around. This is all thanks to Microsoft's new ISO File Recovery tool (requires Windows 10) which allows you to open ISO files directly from the operating system that created them. In fact, the tool works for both Windows 7/8.1 and Windows 10 Anniversary Update. To use it you just navigate to the file on your system, select it and click the open button. Then click OK and you'll be prompted to insert the USB drive. Once you've inserted the drive and selected it, you'll be prompted to select the device on the pop-up which will open the ISO file you want to recover. All you do then is click Yes, Create a new blank USB startup disk, and the files will be transferred over. As you can see, it's a very simple process but you do need to have the ISO file open as you'll need to click Yes to open the file on the new system. That's not a problem if you know where to find the file and what type it is. Good decision or bad? The arrest of four teenagers for abusing a dog and then throwing it off a cliff in Edinburgh will go before an official committee later this month (reproduced by permission of The Herald). It is claimed that the act was carried out in a park. Some interesting comments here. I used to live in Edinburgh, UK. The toughest dog I've ever seen belonged to a vicar and used to hang around the town centre looking for stray cats. When I was a kid in the 1960s, the grounds of Holyrood Park were used for dog fights. The only people who could stop the fights were the police and people volunteering as paid "dog wardens". I'd be pretty annoyed if I came across a fight there now! Sling side-ways backrests with improvements for vertical support of the upper body have recently been proposed. The backrests
